Construction Update Packard Avenue Sewer & Water

This letter is being sent to all property owners affected by the Packard Avenue Sewer & Water Project to update you on the information we have to date:

As a refresher, the work being done this year is strictly the sanitary, water, and storm sewer replacement. The sanitary and water lateral(s) for each property will also be replaced to the property line. The pavement will be temporarily patched and maintained until 2017 when the road will be fully reconstructed.

Contractor: On May 3, 2016 the City awarded the utility contract to Underground Pipeline.

Start Date: The contractor has given the City an approximate starting time of August 1st but they are working on other jobs so the start time could change. The City will be meeting with the contractor around the end of June which will allow the City to get a better idea of the contractor's timeline.

Sanitary Lateral Assessment: For those who did not attend the assessment hearing or check the website, the maximum amount a property owner will pay for their sanitary lateral assessment is \$2,800.

Possible Work by Others

We Energies informed the City that they plan to replace the gas main on both sides of the street. This work could coincide with the sewer and water work being performed by the City's Contractor. The location of the new gas mains would be near the sidewalk. The City may have a better idea regarding the gas main replacement after the gas company applies for a permit.

No other information is known at this time. After the preconstruction meeting with the contractor in June, another notice will be sent out with construction information and a schedule. **Please direct questions regarding the construction to the Engineering Department.**
