

PACKARD AVENUE STREETSCAPE

STREET FURNITURE SPONSORSHIP

Don't miss out on the opportunity to leave your mark on the new Packard Avenue Downtown Streetscape without signing the wet concrete! Downtown Cudahy will be outfitted with black, powder coated, cast aluminum benches scattered throughout the project area. These benches will fit in nicely with the new slate stamped concrete and other streetscape furnishings like trash receptacles and bike racks. This is a great chance to support a long lasting community project.

GRAMERCY BENCHES

Honor businesses, groups, organizations, and loved ones on a custom, laser engraved plaque. The bench was specifically chosen to accent the Cudahy Downtown Streetscape and is made with a black powder coated, cast aluminum frame to avoid rusting. Location requests will be taken into consideration but cannot be guaranteed. Bus stops along Packard Avenue will be the primary focus.

Quantity is limited.

Benches to be installed in Fall 2015 & Spring 2016

COST: \$900 (includes plaque and install)
