

Crown Castle Telecommunications Utility Project

Your neighborhood is getting an upgrade.

Crown Castle NG Central LLC (“Crown Castle”), a certified public utility in the State of Wisconsin, has been authorized and permitted by Cudahy to do telecommunications utility work in the City. Crown Castle will be installing fiber cabling and associated utility and communications equipment within the public right of way. The installation will largely take place on and around existing infrastructure like utility poles and/or streetlights. Crown Castle will also be upgrading with new streetlights to improve the neighborhood appearance and support unobtrusive communications equipment.

Answers to questions you may have.

Will my cell phone coverage improve?

The infrastructure and equipment installed is available to all wireless carriers such as AT&T, Sprint, Verizon, and others. Based on customer demand, your carrier will decide if and how they utilize the new infrastructure to improve coverage and capacity.

Will this installation disrupt my day?

All work will be done during regular business hours, and Crown Castle doesn’t anticipate significant noise or traffic disruption.

Who is Crown Castle?

Crown Castle is the nation’s leading provider of wireless infrastructure. If you have any questions or concerns, please contact Crown Castle at **888-632-0931** or visit CrownCastle.com.
