Combo	Oconomowoc			x	x	x	8.5 min.	21	42%	29	58%	50

*FT = Full time. Depts with at least 85% of full-time staff.

Combo = Combination departments with both full time and volunteer or "paid-on-call" firefighters

**NFPA Standard 1710 only applies to "Full time" fire departments.

For Combination departments, NFPA 1710 does not apply, therefore the 6-minute response time does not apply. However, for the sake of an apples-to-apples comparison among SE Wisconsin departments

***With the help of Cudahy Fire Chief Dan Mayer, we were able to filter out mutual aid calls to other communities, which improved their average time to 2.8 minutes and their pass rate to 99%. However, since we are not able to perform the same filter for every community, we've kept the original numbers on the list in tact, with this notation.
